BlackBerry remote unlock by IMEI - new security

BlackBerry remote unlock is a temote SP lock remove service by special code. It does not matter model or network operator. We need IMEI number of your phone which you can dispplay by typing in *#06#. For each IMEI there is only one unlock code.
In comment field - please give model, IMEI, country and full name of the network in which your phone is locked.
We usualy send code in 2 hours - during business hours.
These codes work only for 'new security'. When your Blackberry has IMEI xxxxxx/**03**/xxxxxx/x for example 351845**03**4426307 - it means this is 'new security' and code WILL WORK.
If you do not know to which network/operator your phone is locked - please order BlackBerry MEP
