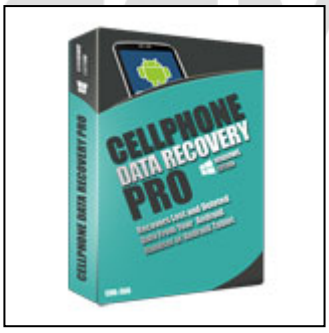
CDR300 CellPhone Data Recovery Pro for Android



CDR300 CellPhone Data Recovery Pro for Android is software which can be used for personal or professional use to retrieve existing and recover deleted data from Android smartphones. With your Android device connected to your PC, the software will read and explore the handset, and display data found on the device on an easy to manage interface on your PC. The SmartPhone Recovery Pro will also explore the SD card in your device and display its data. Recoverable deleted data includes SMS text messages, photos and videos. You can also view existing contacts, SMS text messages, call history, calendar items and internet history. All data found can be exported as a backup to a location of your choice on your PC for future use and to protect against potential data loss in the future.

Features
Quick and easy install process ï the software will launch immediately after installation on the PC has completed
With the SmartPhone Recovery ProTM downloaded and installed on your PC, the software will automatically detect your Android handset and connect to it.
Export retrieved data to Excel
Export photos/videos to your PC
