Gevey All in One AIO SIM for iPhone 4 4s with programmer

Card programmed for certain model, version and network
Gevey All in One AIO for iPhone 4 4s is the latest version of Gevey SIM which can be reprogrammed using special reader to work in different modes. It's the first type of card which you can easily reprogram without need to purchase a new card - within 1 minute it can work as ULTRA, SUPREME, PRO PLUS, PRO edition. It can also work as iPhone activation card.

Gevey sim AIO+
Programmer
Supported models:
iPhone 4 iOS 4.1, 4.2, 4.2.1, 4.3, 4.3.1, 4.3.2, 4.3.3, 4.3.4, and 4.3.5 (bb iPhone 4 iOS 5.01 5.1 5.1.1 baseband below 4.11

* Step 1: Turn off your iPhone 4 and insert SIM card and Gevey together with the metal SIM tray provided.
* Step 2: Turn on your iPhone and wait for the SIM Welcome menu to show and then select accept.
* Step 3: At the beginning a no service message will show on your iPhone. Do not do anything and wait until you see one signal bar appears on the top left corner.
* Step 4: After you see the signal bar you dial 888 and hang-up within 2 seconds.
* Step 5: Turn on the Airplane Mode and then turn off right away. Your iPhone will show SIM Failure and then No SIM Card

Installed.
* Step 6: Signal will show up after few seconds.

Complete contains:
- Gevey All in One SIM
- SIM tray for iPhone 4
- programmer
