GSM DVD

The newest software and solutions recorded on DVD-R give you possibility to remove SP-lock (simlock), upload or change language and version of software, read user code, upload/change logo and ringtones. Also you can repair damaged phones thanks to our service manuals LEVEL-2 which are also included. Besides you will find service repair hints, phone's schemes and pinouts. It is the only and the biggest library of GSM stuff available !

On our GSM DVD you will find software which can be used to:
remove simlock
read phone code
update software in your phone
change languages
repair 'Nokia contact service', 'Ericsson tampered', 'Panasonic Unauthorized action', 'Contact provider' and other software problems
activate netmonitor
upload new logo, ringtones
send flash SMS
read SIM cards
manage phone book

GSM DVD contain:

simlock remove software
phone code reset software
service manuals
repair books in PDF format
repair hints
diagrams
repair photos
photos of phones' main boards
phone pinouts to make cable by yourself
cable schemes
schemes and hex file for unlocking devices, clips etc

All programs are checked by antivirus software with latest antivirus database.

The list of software you can find **HERE**
