Paraben P2 Commander

Product Overview
P2 Commander allows investigators to focus on specific areas of an exam by using advanced data processing engines. Whether you're completing an examination from start to finish or focusing on email or internet history analysis, P2 Commander's robust features will make your investigation easier.
Specialized Email Analysis Whether it's simple single user email such as .PST files or complex network email archives with hundreds of gigabytes of messages, P2 Commander's deep level email examination engines can help you analyze email, recover deleted email, and sort out and analyze attachments.
Specialized Chat Analysis Chat logs can be a crucial part of an investigation. The chat examination capabilities in P2 Commander allow you to automatically find chat logs and read them in a friendly format.
Specialized Registry Analysis By analyzing the registry and system files, the Data Triage feature of P2 Commander saves you valuable time and automatically parses out the most important data regarding the system, installed software, USB usage, and more.
Specialized Internet File Analysis Specialized analysis engines for Internet Explorer, Firefox, and Chrome allow investigators to piece together internet usage activities. From images, to web pages, to history, to cookies and more, internet files won't get past P2 Commander
Specialized Pornography Detection Scan every image in your case for potential pornographic content. By using over eleven different algorithms to determine everything from skin tone, body shapes, faces, eliminating backgrounds, and more, the illicit image detection capabilities in P2 Commander can be another huge time saver for your case.
